DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4, 9, 10, 13-15, and 17 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Claims 1-4; prior art fails to disclose or suggest, inter alia, an apparatus having an electrostatic discharge device having a second current sink transistor coupled in series with the first current sink transistor and having a gate to receive the first intermediate voltage potential and a current carrying electrode to receive a ground voltage potential; and a drive circuit to limit the first intermediate voltage potential to the gate of the second current sink transistor wherein the drive circuit comprises an inverter with an input to receive the first intermediate voltage potential.

Claims 9, 10, 13-15 and 17; first and second- transistor connected in series between a positive voltage supply and a ground potential where a gate of the second transistor receives an intermediate voltage potential; an RC timer to receive the intermediate voltage potential and generate a signal coupled to a gate of the first transistor; and a drive circuit that includes an inverter to receive the intermediate voltage potential, where the inverter drives a pull down transistor to limit the intermediate voltage potential supplied to the gate of the second transistor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
